

I have had an excellent experience with MTC Works! Not only did it help me obtain my co-operative experience for my degree, but it also enabled me to become employed at Silverline Windows as a Continuous Improvement Specialist. After having my mechanical engineering degree for only one month, MTC Works! alerted me of the job opening, and then sent my resume that eventually led to my employment. MTC Works! made the job hunt a less stressful experience, and without it, I would not be where I am today. Thank you MTC Works!.
